

West Windsor Selectboard
Draft Minutes
October 28, 2016

Present: Dick Beatty, Tom Kenyon, Win Johnson, Mike Spackman, Martha Harrison, Laura Farrell, Bill Stillson, Dennis Brown

At 2:00 PM, those present met in the vicinity of the warming hut at the former ski area on Ski Tow Road. There was no need to discuss AT&T's proposed electrical service, except to confirm that their planned route runs along the east side of the burned-out Lodge property and then runs south toward the temporary cell tower. Discussion focused on options for winter access to the Ascutney Outdoors (AO) warming hut area and the West Windsor Mountain Water System. Highway Foreman and Fire Chief Mike Spackman will specify the improvements that need to be made to the road to make it accessible for an ambulance or a fire truck. There was discussion about the agreement between AO and the town that AO would be on-call to provide water system staff with transportation to the booster pump building and/or Reservoir #1 when winter conditions prevent access by pick-up truck. Regarding signage, Mike is set to order the "No camping or overnight parking" signs. The meeting was adjourned by consensus a few minutes after 3:00 PM.

Respectfully submitted,

Martha Harrison
